NEW FEATURES
KITCHEN, BATHROOM
AND LIVING AREA

FURNITURE MADE IN GERMANY.

Beginning August 1, 2020 end consumers will find a new label on the market, which gives them information about furniture quality: “Furniture Made in Germany” is the geographical origin mark in accordance with RAL-RG 0191, which labels German-made furniture that meets verifiable, strictly defined criteria. The label is intended as a decision-making tool to aid end consumers with furniture purchases within the domestic furniture trade as well as internationally.

nobilia has always been a trailblazer when it comes to matters of quality and sustainability. With the Made in Germany label, nobilia is once again among the pioneers, and was the first kitchen furniture manufacturer to be distinguished with the new label.

The new label is subject to very strict conditions, which have been established by (RAL) Deutsches Institut für Gütesicherung und Kennzeichnung (German Institute for Quality Assurance and Certification). RAL developed and introduced the label together with the (VDM) Verband der Deutschen Möbelindustrie (Association of the German Furniture Industry). Compliance with the requirements is monitored by the (DGM) Deutsche Gütegemeinschaft Möbel (German Furniture Quality Assurance Association) on behalf of the VDM. In practical terms, “Furniture Made in Germany” means that the design, assembly and quality testing of the certified furniture takes place in Germany. Additionally, the manufacturing processes relevant to the quality must take place predominantly in Germany.

Furniture Made in Germany.
nobilia’s mission for the last 75 years.

TODAY’S FURNISHINGS WITH AN EYE ON TOMORROW.

With our new features for 2021 we are focussing on trending décors, a wide variety of planning options, an unmistakable and holistic line layout and innovative quality improvements in the details. Good news that enriches quality of life and inspires our customers.

MORE VARIETY

Fronts create the look, and not only in the kitchen segment. Our current newcomers encompass everything from warm shades of concrete to dark wood looks and soft, light hues in individualised décors to the fascinating glass appearance of ARTIS in Titanio matt.

LINE N

CARCASE COLOUR 127
Black

A strong statement

A black carcass harmonises with dark grained wood décors, but is also stunning in matching shades when planned with dark-coloured fronts and is ideal for a holistic design that integrates kitchen, living area and bathroom.

SOFT WHITE

Bright enthusiasm! Finally, the successful EASYTOUCH surface is also available in the best-selling shade of alpine white. Of course, with anti-fingerprint coating.

QUARTZ WORKTOPS

Quartz worktops impress with their high quality, natural-looking appearance and exceptional usability. The advantages: Even without extra impregnation, quartz is water-proof. The surfaces are particularly easy to clean and hygienic. This makes them perfect for kitchen and bathroom designs. Quartz worktops are available in thicknesses 12 and 38 mm. The corresponding niche cladding is 12 mm thick. As with the Xtra worktop, flush-mounted installation of technically approved hot plates and sinks is also possible.

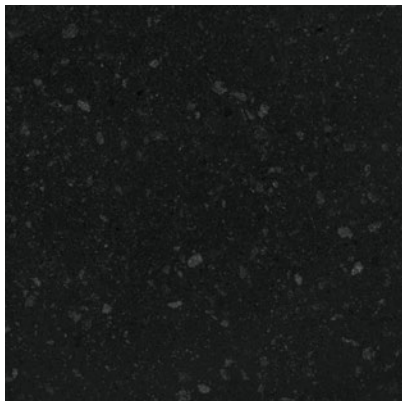

Everything from one source! This basic principle also applies to quartz worktops: Worktops and niches are supplied in a single process along with the entire commission within the standard delivery time. One order. One delivery!

MADE-TO-MEASURE KITCHEN DESIGN

Good news for even more creative freedom in individual planning. This year we are taking the next logical step in our grid reorganisation. We are combining an even more consistent line layout with increased planning reliability, a surplus of storage space and quality improvements in the details. In this way, future planning will be even more individualised and more flexible and achieve a holistic, perfected look through optimised symmetry.

Continuous fronts

For an especially linear look with plenty of tranquil surfaces, the Maxi height is now also available with continuous fronts.

With it, all three base unit heights – standard / XL / Maxi – are available in one comparable product range.

To simplify planning, the item abbreviations differ only in the last digit position: US60 / US60-X / US60-M.

More side depth

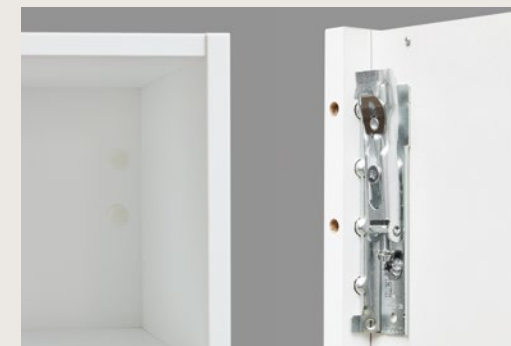

You can never have enough storage! Which is why all wall cabinets just increased their storage space with the new side depth of 350 mm for all wall and dresser units.

For perfect symmetry in the kitchen, the 864 mm size is also available as the new wall unit height 3. With this, the wall unit mirrors the height line of the Maxi base units. Also new and perfectly matched: tall unit height H-3 in 2160 mm and dresser unit height A-3 in 1402 mm.

Flush finish
Dresser unit height A3:
1402 mm high

Perfect symmetry
Wall unit height W3:
864 mm high

Flush finish
Tall unit height H3:
2160 mm high

Concealed suspension

A strong innovation with many advantages. The standard, concealed wall unit mounting scores big with individualised adjustment options, high load-bearing capacity as well as simple installation and alignment.

Flush fronts

Shelf units are wonderfully suited to creating select breaks between continuous closed surfaces and setting design accents. To optimise the design lines, all shelf units are now produced front flush as standard. For even more flexibility, shelf units can also be supplied with adjustable shelves for a surcharge.

FLEXIBLE HEIGHT SYSTEM

Flexibility, individuality and storage space are at the very top of kitchen buyers' wish lists. Combined with worktops and plinth panels of varying heights, our height system flexibly adapts the kitchen design to the user's individual needs – with three full size base unit heights and one mini height.

In addition, we offer an ergonomically optimised activity height for a variety of activities, such as meal preparation, cooking and washing dishes. Four different plinth heights and three worktop heights make this individual fine-tuning possible.

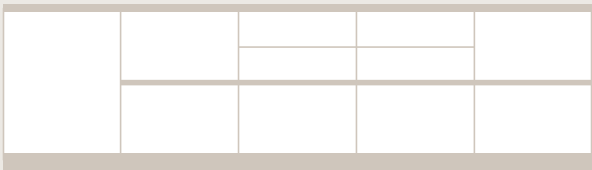

120 %	MAXI – 86.4 cm
110 %	XL – 79.2 cm
100 % Storage space	STANDARD – 72 cm
	MINI – 57.6 cm

FRONT DIVISIONS AND SYSTEM HEIGHTS

Our front divisions are designed for continuity and practical use. They offer the best conditions for planning a kitchen based on a variety of requirements. The important criteria for this: the optimum activity height. The 141 mm high drawer defines the line layout and is the measure of all things.

STANDARD – carcass height 72 cm

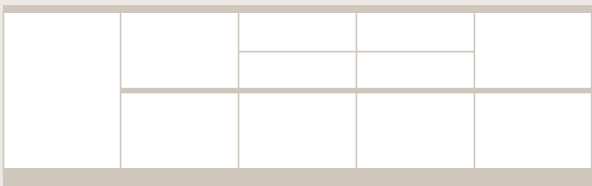

Possible working height 80.2 - 95.8 cm
Recommended for physical height upwards of approx. 150 cm

Suitable for handleless kitchens

XL – carcass height 79.2 cm

Possible working height 87.4 - 103 cm
Recommended for physical height upwards of approx. 170 cm

Suitable for handleless kitchens

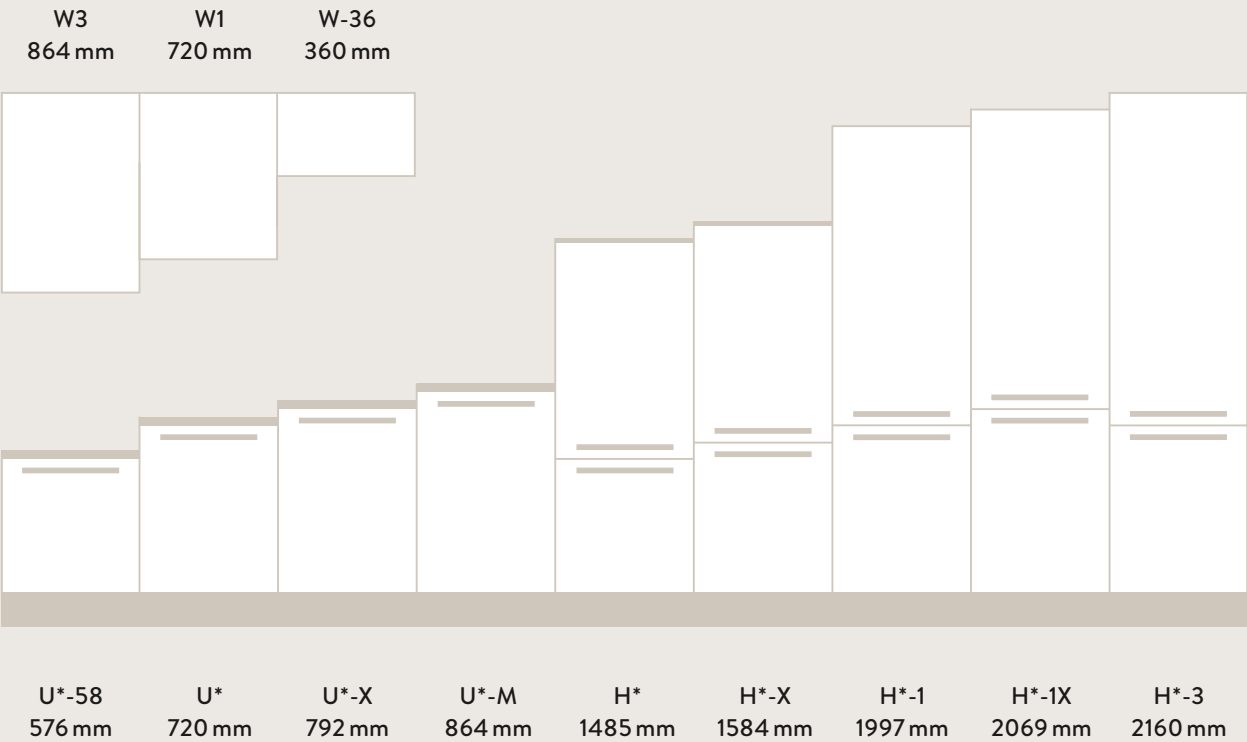

MAXI – carcass height 86.4 cm

Possible working height 94.6 - 110.2 cm
Recommended for physical height upwards of approx. 180 cm

TAILOR-MADE DESIGN

Distinguishing features of our technical planning: Diverse design possibilities with unit heights optimally adapted to one another. For continuous planning with harmonious lines.

A functional distinguishing feature: the 141 mm high drawer.
Our drawer dimensions offer plenty of space, even for accommodating oversized kitchen gadgets. There's even enough space for soup ladles or whisks here, where they are readily accessible.

NEW FROM THE KITCHEN

There's something cooking in our kitchens. Discover new planning and design options and a multitude of surprising ideas, which make life in the kitchen even more individualised and convenient.

WE SET OUR SIGHTS HIGH

New favourite item for planning: The extra tall wall unit with glass doors, Flat, convinces with its elegant glass cabinet character. The mechanical glass slatted front for the Climber wall unit offers a convenient and well-priced alternative. Our popular roll-up front units now come in new colours. And all that in the new side depth of 350 mm with a new concealed mounting.

SAMSUNG

A strong partnership for complete marketing:
nobilia is supplementing its appliance portfolio with 35 appliances from Samsung.
That means even more modernity, design and innovation for nobilia kitchens.
Perfect for the target group of design-oriented and tech-savvy users.

- Product range
- 5 Cooker hoods
 - 10 Ovens
 - 1 Cooker Set
 - 2 Compact appliances
 - 1 Microwave
 - 2 Warming drawers
 - 7 Hot plates
 - 2 Dishwashers
 - 2 Integrated fridges
 - 3 Free-standing appliances

Dual Cook. The dual oven.
It sounds like a dream, but it's real. Dual Cook lets you prepare two meals at the same time at different temperatures without any flavour transfer. It's simply convenient and saves time and energy on top of that.

True steam cooking and interval steam cooking possible

- Combination of a variety of operating modes over 8 different types
- The only oven on the market with genuine steam cooking and pyrolysis
- TFT colour touch display
- WiFi capable / SmartThings

The right control for everyone
The household appliances of the Infinite design line offer various types of control: Via touch on the intuitive 4.3 inch colour display, or a physical control knob, from the smartphone in the SmartThings App and via voice-controlled assistants.

Infinite design with a vertical focus

- Reduced to the essentials
- Focus on control panel and window
- Black glass design
- Created by the German designer duo Relvão-Kellermann

nobilia is expanding its partnership with BORA through a unique cooperation: The BORA hot plate extractor fan GP4 is available exclusively through nobilia's complete marketing programme. The unique cooperation is based on innovative high-end cooker hood systems for the nobilia kitchen. A real added value for anyone who appreciates intelligent, clean solutions.

BORA hot plate extractor fan GP4

- Available exclusively through nobilia within the complete marketing programme
- Self-contained design based on the Bora Basic appliances
- Flush-mounted or surface-mounted installation is possible
- For surface-mounted designs the GP4 can be planned with a hot plate frame

Easy installation

nobilia's product range has been technically optimised to simplify installation and thus reduce installation times to a minimum.

Smart storage & maxi space

Optimised built-in dimensions of the GP4 enable perfect planning and make use of the entire drawer interior beneath the hot plate extractor fan. And there is still plenty of room left for spices or wooden spoons.

NEW FROM THE BATHROOM

At a glance! Well-thought-out highlights make our bathrooms even more inviting and convenient.

and LED light

—
Height: 1584 mm,
Depth: 146 mm,
aluminium frame,
1 storage shelf 111 mm,
LED light on top and bottom
Available widths: 400, 600, 800 mm
—

Available in:
010 Black
193 Alpine white

Floor-standing planning
with MP-SOWR

-
- As an alternative to the wall-mounted design, a floor-standing design for our media wall systems is also possible
 - The plinth foot set MP-SOWR is available for this purpose
 - The set consists of 5 plinth feet and is installed on site
 - The plinth foot is 20 mm high, adjustment range: + 5 mm / - 0
 - Diameter: 50 mm

Designs with
cable feed-through KDW

-
- A neat cable feed-through in top shelves or worktops is vital for designing a media wall system
 - The cable feed-through KDW is available in the colours 014 Stainless steel appearance and 010 Black
 - Diameter: 67 mm
 - The cover of the KDW can be locked
 - This product is installed on site
